eMedia: What's New?

eMedia began as a video download service and has grown rapidly to include many interactive and visual resources in addition to the familiar UIMC video titles you may expect. Integrating the PBS LearningMedia resources, adding my.uen access for a personalized searching, browsing and saving experience, as well as including packaged online courses for download, there is a lot to learn about and explore in the new eMedia!

EBooks

eBooks and eReaders: more than digital ink!

This session surveys tools and strategies for eBooks and eReaders in education. See options for eReader devices including Kobo, Kindle, Nook, and others. Explore sources for free eBooks and use tools to organize them on your device. Learn about Overdrive and how you and your students can download books from your public library's site. Discover some great ideas for integrating eBooks into your library and managing the devices for groups of students.

Pioneer Library and the New Utah Core

Pioneer, Utah's Online Library continues to provide important rich and relevant resources for Utah's educators and students. With over 10 licensed products alone, ranging from World Book Encyclopedia to EBSCO's 30+ professional research databases and links to many other library and research-related resources online, it can be challenging to keep up with everything that's there. In this session, see highlights of new or hidden gems among the licensed products, as well as several resources and strategies that tie in beautifully with Utah's new core standards for literacy, especially in elementary grades.

Next Steps for Koha

if you are using Koha please don't miss this important workshop on the new and improved features. We will discuss our next steps and where we are going with the Koha project.

Funding Technology Library Projects

Come and learn how to find and fund technology projects through grant writing.

Take *Your* Students on a Virtual Field Trip!

Come see a live, high-definition demonstration of how video fieldtrips can bring the world into your classroom. Explore the possibilities that await and see what equipment is needed and just how easy, and cost effective, it is to take a video fieldtrip without ever leaving your school. Crossing all curriculum and grade levels, video fieldtrips can enhance your students' experience and really take them (virtually) anywhere in the world!

Media Management Magic and Mobile Devices

Join us to take a look at an easy-to-use new approach to managing and distributing digital media in your school to both computers and mobile devices - Plex. We'll also overview the myriad of e-book capable mobile devices, and point you to some amazing free e-book sources.

Chrome and the Google Way

In this session, we'll show you some of the great features of the Google Chrome Web browser, Google Search, and other Google services that you might not be aware of to make searching, working with online resources and accessing services much, much easier.

Teaching information literacy in the K12 media center

Phil Roche-Assistant Professor of Library Media at SUU to present

John Eye-Dean of Library Services

Weeding and Planting

Jean Truman-Librarian at Canyon View explains how to weed, re-invent and restock your media collection.
