

SEDC ADMINISTRATORS SUMMER CONFERENCE

Are you prepared to lead your school in blended and digital learning? Leadership in Blended and Digital Learning (LBDL) is an innovative approach to building leadership capacity to implement blended and digital learning in districts and schools. Developed by the Friday Institute for Educational Innovation at NC State, LBDL provides leaders with a rich, engaging blended experience where they learn to transform their schools with blended and digital learning, enabling personalized education for their students. Throughout the program, you will receive hands-on professional learning, research based blended content, ongoing opportunities for collaboration and learning, support from experienced professionals, and access to a national community of leaders implementing LBDL. Many districts Utah are in the process of implementing this valuable program with their administrators.

DR. KATHY SPENCER Senior Consultant, The Friday Institute

Dr. Kathy Spencer serves as senior consultant for The Friday Institute for Educational Innovation and coach for schools and districts across the country. She has served as the Superintendent for Onslow County Schools, NC for 30 years. She has been recognized for her work nationally as a Tech Savvy Superintendent and as an International Society for Technology in Education (ISTE) Making It Happen winner. Her global education efforts led her district in serving as a model across the state of North Carolina through the Global Schools Network.

Derek Larson & Clint Stephens from SEDC, Jared Covili from UEN, and Tony Campbell from Washington County will be directing the festivities along with Kathy.
