

CMAP

COMMUNITY MAPPING WORKSHOP

The Community Mapping Program involves teachers and students in a community-based project that incorporates geo-spatial technology and other characteristics of active and inquiry-based curriculum. Students use GIS (Geographic Information Systems) & GPS in the process of discovering and answering questions about their community, rather than learning technology for technology's sake. The five day Community Mapping Workshop models active classroom and fieldwork with community partners as participants design a classroom project. If you are a Utah 4-12 grade teacher or administrator, join us!

Benefits:

- Build relationships with local community leaders and GIS professionals
- Analyze real-life issues in the community
- Use GIS, GPS and other geo-spatial technologies to enhance the understanding of issues and facilitate informed decision-making
- Design a local community project for your classroom
- Free ArcGIS Online organizational account
- 3 Semester hours credit
- Required for GIS Endorsement
- Elective for ETEP Endorsement

Participant Costs:

- Workshop is FREE!
- Registration fee for SUU credit (optional)

2019 WORKSHOP LOCATIONS & DATES

- St. George, Dixie Middle, June 3-7
- Salt Lake City (UEN), Aug 5-9
